SURVEY REVIEW

The students from Cheryl Morse's Georgraphy class from the University of Vermont presented attendees with information they gathered from the Working in Greensboro Survey 2017 which was posted throughout town and given to various businesses in town that requested individuals to complete an online survey or hardcopy. The y reviewed information pertaining to the assessment of employee housing, commuting and quality of life findings. There is an estimated 200 employees in town and half of them responded to the survey. 87 responses were received from Greensboro employees between the age of 19-65 however the 23-55 year old group was the group that largely responded. Discovery was that most people were content as to where they currently lived and with the amenities that they had. Overall the reasons not to move were due to rural, cell service, night life and affordability.

Meeting Adjourned 8:15 pm.

Respectfully submitted,
Audrey DeProspero, Zoning Administrator
